Accounts of Treasurer for 1950 140
Addey, F., Report of his observatory (Long Sutton) 216
Almond, Mary, The summer daytime meteor streams of 1949 and 1950. III. Computation of the orbits 37
—— *J. G. Davies and A. C. B. Lovell*, The velocity distribution of sporadic meteors. I. ... 585
Armagh Observatory, Report of proceedings of 189
Aspinall, A. and G. S. Hawkins, The summer daytime meteor streams of 1949 and 1950. I. Measurement of the radiant positions and activity 18
Associates elected 345
Atkinson, R. d'E., The computation of topocentric librations 448
—— *and D. H. Sadler*, On the use of mean sidereal time 619
Auditors' report for 1950 138

Barker, R., Report of his observatory (Cheshunt) 216
Bates, D. R., Rate of formation of molecules by radiative association 303
Bondi, C. M. and H. Bondi, Models for red giant stars. III. Models with a single discontinuity of composition and opacity due to electron scattering 397
Butler, H. E., Photoelectric recording of stellar occultations 393

Cambridge, Cavendish Laboratory, Report of proceedings of 192
Cambridge Observatories, Report of proceedings of 189
Canberra, Commonwealth Observatory, Report of proceedings of 211
Cape of Good Hope, Royal Observatory, Report of proceedings of 185
Carter Observatory, Report of proceedings of 215
Cavendish Laboratory, Report of proceedings of 192
Celestial mechanics: Report on progress of astronomy, *G. M. Clemence* 219
Christchurch, Canterbury University Observatory, Report of proceedings of 215
—— *Geophysical Observatory*, Report of proceedings of... 214
Clemence, G. M., Celestial mechanics (Report on progress of astronomy) 219
Comets: Report on progress of astronomy, *G. Merton* 237
—— On the structure of comets and the formation of tails, *R. A. Lyttleton* 268
—— Accretion and the origin of comets, *P. J. D. Gething* 468
Cosmology: Expanding world-models characterized by a dimensionless invariant, *G. J. Whitrow and D. G. Randall* 455
—— A model of a spiral galaxy, *G. C. McVittie and Cecilia Payne-Gaposchkin* 506

Das, A. K., Solar activity: prominences (Report on progress of astronomy) 234
David Dunlap Observatory, Report of proceedings of 204
Davies, J. G. and J. S. Greenhow, The summer daytime meteor streams of 1949 and 1950. II. Measurement of the velocities 26
—— *Mary Almond and A. C. B. Lovell*, The velocity distribution of sporadic meteors. I. ... 585
Dunsink Observatory, Report of proceedings of 202

Earth, Atmosphere of: A diffraction theory of the scintillation of stars on optical and radio wave-lengths, *C. G. Little* 289
—— Rate of formation of molecules by radiative association, *D. R. Bates* 303
—— The blue Sun of 1950 September, *R. Wilson* 478
Edinburgh, Royal Observatory, Report of proceedings of 181
Errata 641
Evans, David S., The occultation of Antares of 1950 June 27–28 64
—— Surface photometry of southern elliptical nebulae 526
Evershed, J., Report of his observatory (Ewhurst) 216

PAGE

Fellgett, P. B., An exploration of infra-red stellar magnitudes using the photo-conductivity of lead sulphide 537
Fellows deceased 129
—— elected 1, 125, 267, 345, 346, 426, 523
Finsen, W. S., An eyepiece interferometer 387

Gardiner, J. G., Integration of the Cowling stellar model 94
—— A model of a red giant star 102
Garstang, R. H., Energy levels and transition probabilities in p^2 and p^4 configurations ... 115
George Darwin Lecture announced 126
—— delivered by Antonie Pannekoek 347
Gething, P. J. D., Accretion and the origin of comets 468
Gifts to the General Fund of the Society 147
—— to the Library 152
See also Presents announced
Glasgow, University Observatory, Report of proceedings of 194
Godlee Observatory, Report of proceedings of 216
Gold Medal, Announcement of award to Antonie Pannekoek 1
—— Presidential address on award 245
—— Presentation of 346
Gottlieb, K., A. R. Hogg, G. V. Simonow and Beryl Hall, Photoelectric observations of some spectroscopic binaries 339
Greenhow, J. S., J. G. Davies and, The summer daytime meteor streams of 1949 and 1950. II. Measurement of the velocities 26
Greenwich Royal Observatory, Report of proceedings of 176
—— Mean areas and heliographic latitudes of sunspots in the year 1946 422
Gum, C. S., Photoelectric observations of BD -3° 1413 (HD 44701), a new eclipsing binary... 634

Hall, Beryl, A. R. Hogg and, Narrow-band photoelectric photometry of bright southern stars 325
—— *A. R. Hogg, K. Gottlieb, G. V. Simonow and*, Photoelectric observations of some spectroscopic binaries 339
Hampstead Scientific Society Observatory, Report of proceedings of 216
Hanbury Brown, R. and C. Hazard, Radio emission from the Andromeda nebula 357
—— A radio survey of the Cygnus region. I. The localized source Cygnus (1) 576
Haughton, J. L., Report of his observatory (Charmouth) 217
Hawkins, G. S., A. Aspinall and, The summer daytime meteor streams of 1949 and 1950. I. Measurement of the radiant positions and activity 18
Hazard, C., R. Hanbury Brown and, Radio emission from the Andromeda nebula 357
—— A radio survey of the Cygnus region. I. The localized source Cygnus (1) 576
Heath, M. B. B., Report of his observatory (Kingsteignton) 217
Herget, P., Minor planets (Report on progress of astronomy) 232
Hogg, A. R., The eclipsing system Zeta Phoenicis 315
—— *and Beryl Hall*, Narrow-band photoelectric photometry of bright southern stars ... 325
—— *K. Gottlieb, G. V. Simonow and Beryl Hall*, Photoelectric observations of some spectroscopic binaries 339
Holborn, F. M., Report of his observatory (Peaslake)... 217
Hyderabad, Nizamiah Observatory, Report of proceedings of 208
—— Occultations of the stars by the Moon observed during the year 1950 343

Imperial College Observatory, Report of proceedings of 195
Instruments, Astronomical: Error balancing in fast Schmidt cameras, *E. H. Linfoot* ... 75
—— An eyepiece interferometer, *W. S. Finsen* 387
—— Photoelectric recording of stellar occultations, *H. E. Butler* 393
—— An exploration of infra-red stellar magnitudes using the photo-conductivity of lead sulphide, *P. B. Fellgett* 537
Interstellar Matter: On the structure of comets and the formation of tails, *R. A. Lyttleton* ... 268
—— Rate of formation of molecules by radiative association, *D. R. Bates* 303
—— The chemical composition of the interstellar gas, *M. J. Seaton* 368
—— Accretion and the origin of comets, *P. J. D. Gething* 468
Investments 146
